BQSI/MB Fall Meeting
November 14, 2008

Shared Resources Report
Lydia Friedman

In a future release of DOCLINE (date yet undetermined) the ability to prevent requests from routing to a particular library will be added. This will allow libraries to add a library group to their routing table, but exclude individual libraries in that group; to exclude specific resource libraries , or other libraries as part of "Route to Resource Libraries" or "Refer On".

This will be a beneficial enhancement to BQSI/MB members especially if any libraries within BQSI/MB charge for interlibrary loans, or if any other libraries charge more than $11.00 per article. You will then be able to exclude those libraries from your routing table.

There are 392 BHSL libraries listed on DOCLINE (down two libraries from April 2008).

There are 37 BQSI/MB member libraries listed on DOCLINE.

Some BQSI/MB libraries, which are also BHSL members, do not have their BHSL hierarchy listed in DOCLINE. Although the hierarchy is no longer utilized within DOCLINE, it is still an easier way to quickly identify BHSL membership. She asked that members check their DOCLINE records and contact the RML if it is not listed.
