**NEW DOCLINE**

The initial launch of the new DOCLINE, including Loansome Doc, is expected be in August 2018.

NLM is “moving the system to an open source web platform that can be easily adapted in order to more rapidly respond to changes in cataloging and publishing models, changes in library processes and interlibrary loan workflows, and the resource sharing landscape in general.”

NLM is requesting DOCLINE libraries to do the following:

- Establish a Google account to use for logging into the new DOCLINE.
- Complete the User Form in the existing system via the ‘Connect your account today!’ homepage link, in order to connect your Google Account to your DOCLINE library or libraries. See [\*Path to the redesigned DOCLINE\*](#) for more information.

- If you encounter blocked access to Google accounts, NLM recommends working with local IT departments to establish an exemption before the new DOCLINE launch.

NLM is considering alternative options for login that will better meet the needs of organizations and individuals with the most stringent privacy requirements
